## What happens when you enable or disable the Policies feature

As the account owner, be aware of the actions that occur when you enable or disable policies.

### Enabling the Policies Feature

When you enable the Policies feature, you must:

1. Create policies that contain specified permissions
2. Assign existing users to policies

### Disabling the Policies Feature

When you disable the Policies feature, the Policies pane is no longer visible. To view the permissions for your users, you must:

1. Go to **Administration > Users**.
2. Select to view a user.
3. Select Permissions to view and specify permissions.
