

Canceling Data Import

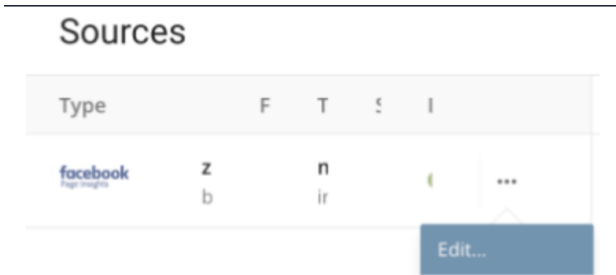

You can cancel data import using the schedule definition of the data connector or by using the jobs page.

- [Canceling by Editing the Schedule in the Data Connector](#)
- [Canceling Data Transfer Using the Jobs Page](#)

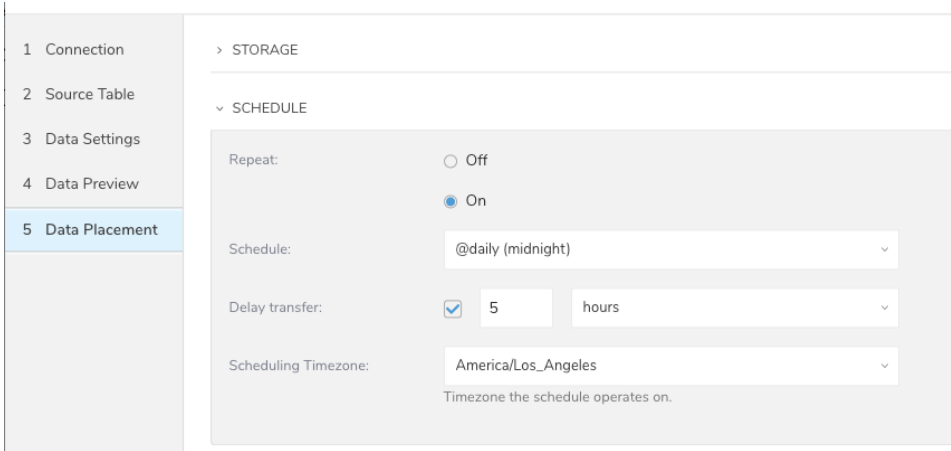

Canceling by Editing the Schedule in the Data Connector

You can remove or change the time that the input transfer is scheduled to execute.

1. Navigate to **Integrations > Sources**.
2. Select the ellipses.
3. Select Edit.

4. Navigate to the Data Placement page.

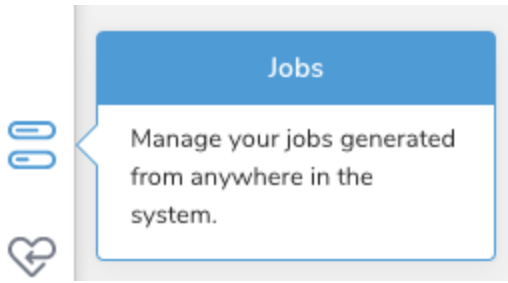

5. Edit the Schedule. For example, select Off.

Canceling Data Transfer Using the Jobs Page

This option is only available while the job is running.

1. Navigate to Jobs.

2. Filter for the job that you want to stop.
3. Select the job.
4. Select Kill.
