

Creating or Viewing a Database

1. Navigate to Workbench > Databases.
2. Select New Database.
3. Give your database a name and optionally type a description.
The name must consist only of lower case letters, numbers, and _.
4. Select Create.

You are taken to a page where you can create or view tables.

TD Toolbelt Example

The `db:create` command creates a table named `test_db` in the cloud.

```
$ td db:create test_db
```

The `dbs` command lists all the databases in your account.

```
$ td dbs
```
