

Creating and Deleting Files

You can create and delete individual files within the Project Editor modal. Delete individual files or delete all the files in a project.

Create New Files

You can set up and save new files prior to editing them. If you do not edit the file or designate a new name, the file is not saved.

1. From inside Project Editor, select the **New File** icon at the top right of the modal.

2. Type a new name.

If you do not specify a name, the default name, `new_file.sql` is assigned.

File Name:

3. You can edit the file directly in the Project Editor.
4. Create additional files for your project by selecting another file or deselecting the **New File** icon.
5. After you've created the files you want, select **Save & Commit**.

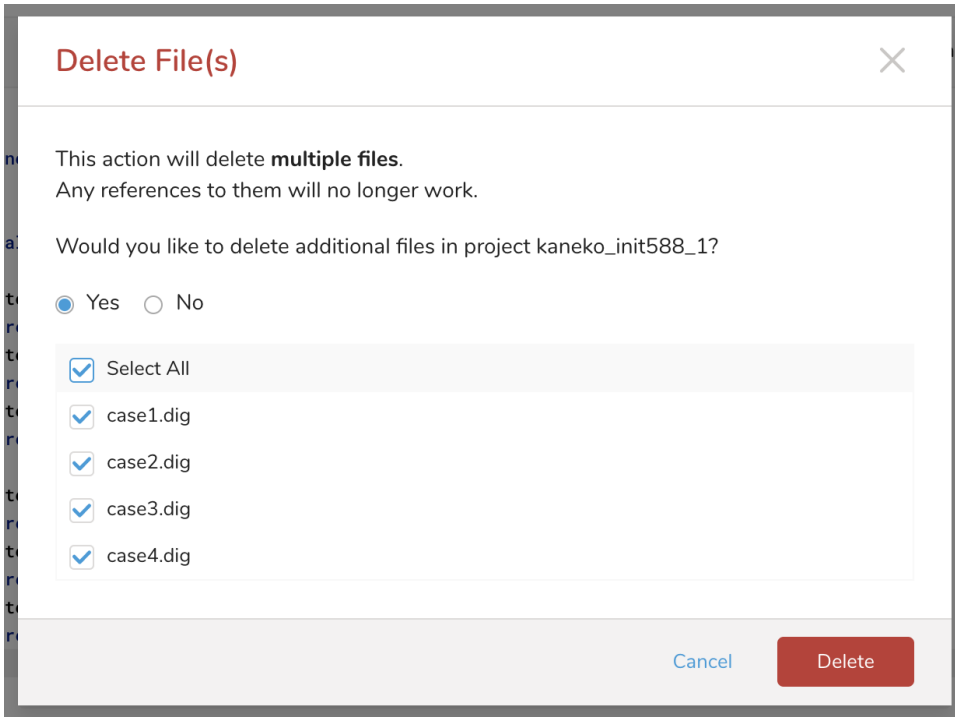

Deleting Files

1. From inside the Project Editor, select the **Trash Bin** icon at the top right of the modal.

2. Specify a single workflow file, multiple files, or all files in a project.

3. Select **Delete**.
