

# Skipping Data Preview

For some data sources you can skip data preview.

To skip data preview

1. Open TD Console.
2. Navigate to Integrations Hub > Sources.
3. Select the connection for which you want to preview the data.
4. Select the ellipsis.
5. Select **Edit**.
6. Edit or define data collection information.
7. Select Next to get to Data Preview.

1	Connection
2	Source Table
3	Data Settings
4	Data Preview
5	Data Placement

The Preview feature shows a subset of possible data that the data connector fetches from the source based on the data settings you set up before. Please refer help document if you have any question about preview data.

[Generate Preview](#) This might take a few minutes based on the volume of data. [Skip this step](#)

8. Select the Skip this step link.  
The Data Placement page displays.
9. Optionally, edit or define Storage or Schedule information.
10. Select **Save & Run Now** or **Save**.
